Winneshiek County Public Health was notified of an additional positive case of COVID 19 in Winneshiek County late yesterday. This person has already recovered and had been in isolation.

Winneshiek County Public Health and our community health partners are stressing the importance of **STAYING HOME**. This does slow the spread.

If you must go out, MAINTAIN the **6 feet physical distancing** – about the length of a twin bed.

Send **one (1) person** out to go to the grocery store to get essentials **for ONE week**.

Utilize social media to connect socially by video streaming, Facebook live, Zoom and other apps. We know you need to socially connect but it must be at a distance for all.

Public notification of any additional positives will be released daily on the Iowa Department of Public Health website.

If you have health concerns with respiratory symptoms, you **NEED** to call your providers first before going to the hospital or clinics.

If you stay home **NOW**, we can have the summer together.

Thank you for helping to keep our communities safe.
